

AMENDMENTS TO THE SPECIFICATION

**On page 1, please amend title page at lines 1-5 as follows:**

APPLICATION FOR PATENT

Inventor: Tsahala David.

TITLE OF THE INVENTION:

A METHOD AND SOFTWARE SYSTEM FOR CREATING  
CUSTOMIZED COMPUTERIZED LIBRARIES

CROSS REFERENCE TO RELATED APPLICATIONS

This application claims the benefit from US provisional application  
60/258,318 filed 28-DEC.-2000 by the present inventor.

FIELD AND BACKGROUND OF THE INVENTION

**On page 10, please amend the paragraphs at lines 20-24 as follows:**

~~FIGURE 1 is an illustration of the participants involved in the creation of a  
eustomized library.~~

FIGURE 21 is an illustration of the system and method of generating a  
customized library.

FIGURE 32 is an illustration of the database layout.

**On page 13, please amend the paragraph at line 1-2 as follows:**

computer center personnel are typically divided in to two groups (refer to  
Figure 1 ~~tables~~ reference characters 17 and 18):

**On page 13, please amend the paragraph at line 15 as follows:**

- | i. SLM's software (~~1121~~) for general library build and update.

**On page 13, please amend the paragraph at line 19 as follows:**

- | ii. SLM's General Library (~~1525~~) – books and shelves

**On page 14, please amend the paragraph at line 3 as follows:**

- | iii. Software (~~1222~~) for customer's profile build and update.

**On page 14, please amend the paragraph at line 6 as follows:**

- | iv. The database of Customer Profiles (~~1626~~).

**On page 14, please amend the paragraph at line 9 as follows:**

- | v. Software (~~1323~~) for creating a customized library on the Internet.

**On page 14, please amend the paragraph at line 13 as follows:**

- | vi. Software (~~1424~~) for creating a customized library on CD.

**On page 14, please amend the paragraph at line 18 as follows:**

- | Figure 21 illustrates the method of typically generating a customized soft library.

**On page 18, please amend the paragraph at lines 6- 11 as follows:**

The automated software process calculates the space required by the customized library on CD. Then the software checks the validity of the linking process. Thereafter an automatic process of customized library inhabiting by required books is activated. Finally, the new-made customized library, together with presentation software, is located on CD and is transmitted to the customer. The above process of creating a customized library and presenting it on CD is illustrated in Figure 21 item 24.

**On page 18, please amend the paragraph at lines 13-16 as follows:**

Additionally the software runs a process in order to present the new library on the SLM's Internet site (as shown in Figure 21 item 23). Once the library is installed on the site, necessary rights are granted to the customer in order to access the specific Internet library.

**On page 20, please amend the paragraphs at lines 8-10 as follows:**

The database ~~consists of~~includes the tables presented in Figure 32.

~~Tables~~Reference characters 301 to 309 refer to documentation created by OEMs

~~Tables~~Reference characters 310 to 317 refer to the customer profiles ordered

**On page 22, please amend the paragraphs at lines 15-19 as follows:**

The programs provide a tool for the entire automated computerized process of producing the customized libraries. The programs for creating customized libraries are typically divided into four groups, as illustrated in Figure 21 and described as following in ~~paragraphs~~section 1 to 4. The presentation software that the customer receives together with the customized library is described as following in ~~paragraph~~section 5.
